

Hi!

Thank you for the opportunity to apply for the exchange program to Finland.

When I first heard about the exchange, I was intrigued, it sounded like a great chance to learn and grow. But when I found out that I needed to create a small project to prove myself worthy, I was even more determined.

At the start of this course, I'll admit I didn't take it as seriously as I should have. Looking back, I regret some of the choices I made. But by the end of the year, I realized that this was something I wanted to do and that I had to work hard to catch up.

Since then, I've focused on improving both creatively and technically, especially during my internship and small/personal projects. I've challenged myself to learn, take initiative/be more vocal, and push my creativity further. But I still have a lot to learn.

That's also why this exchange spoke to me so much. It's a great opportunity to work in a professional environment and continue growing as a web developer. Even though I didn't start strong, I've learned to pick things up quickly and give my best effort in everything I do. Being able to go on this exchange would not only prove to myself, but also to others, that if you try hard enough, you can make it anywhere.

Besides the technical aspect, I'd love to explore cultures that are different from my own!! The food, the music, the weather, and how people live/act in general. Since I've lived all my life in The Netherlands. This could be a great first step.

Thank you for considering my application. I hope to prove how much I've grown and how hard I'm willing to work.

Kind regards,
Dominika Debska
